DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 and 7-27, drawn to a computer implemented method and system for transforming a plurality of chromatographic elution profiles, grouped by basis of intersecting detector response values, classified in class 702, subclass 32. *(If this group is elected, please see species election requirement further below).*
- II. Claim 4, drawn to method for estimating the number of different single nucleotide polymorphisms (SNPs) in a plurality of same length DNA fragments, classified in class 702, subclass 12.
- III. Claims 5 and 6, drawn to a method for detecting the presence of a previously unknown SNP in a test DNA fragment, classified in class 702, subclass 12.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Group I and Groups (II and III) are patentably distinct methods because each have different objectives, different uses, different reagents and different steps in methodology. Therefore the methods are distinct over one another.

The inventions of Groups II and III are patentably distinct because each has different objectives, different uses, different reagents and different steps in methodology. Group II is directed to estimating the number of different SNPs depending upon a resulting number of groups based on the transformed profile shapes; while Group III directed to a comparative test between an unknown test DNA fragment and reference elution profiles. Therefore the methods are distinct over one another.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Species Election

This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species A: Grouping by basis of intersecting profiles, claims 9, 10, 15-17, 21, 22, 25 and 26.
- Species B: Grouping by basis of clustering, claims 11, 12, 17, 18, 23, 24 and 27.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3, 7, 8, 13, 14, 19, 20 and 25 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the

Art Unit: 1634

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
